

Transportation and Public Spaces Committee Meeting Minutes
Tuesday, August 14, 2018
8:30—10:00 am, SMT, Room 4080

We had a really good discussion of where everything is at with the neighborhood project. It sounds like the group is ok with tentatively going forward with both neighborhoods.

We spent a lot of time trying to better articulate the goals of the project, the range of strategies we might be able to pursue, and the intended outcomes. Jon volunteered to create a first draft of a problem statement document, so that we would have something in writing to explain things a bit. Once we have a written problem statement with some basic talking points, we'll be better equipped to determine what our individual roles are and how best to approach potential community partners.

The group also discussed doing some asset mapping to determine what each member of the committee brings to the table and what each of us is hoping to gain from participating. The plan is to discuss this more at the next meeting.

Next meeting: September 11, 8:30—10:00 am, SMT, Room 4080.
