

GetCare Platform Orientation Sessions: Training Part 1

These sessions will consist of an overview of the GetCare platform including: Logging in, navigating through the platform, searching for a client, creating or updating service enrollments and assessments, options for service unit recording and more.

If a session has no attendees in the first 10-15 minutes, it may be cancelled, but all session content will repeat on the dates below. All sessions will be offered virtually via Teams; feel free to join the option that works for your schedule, and to attend more than once. If none of these options will work, please contact your ADS Program Specialist. Additional dates will be added as needed.

Note: Part 2 Training Sessions will cover program-specific entry requirements and service recording process. Session dates for Part 2 will be posted soon and will begin in September. Users are encouraged to attend at least one session in Part 1 and one session in Part 2.

To join a session, click on the link below at the scheduled time.
