KING COUNTY EXTREME HEAT MITIGATION STRATEGY

Daaniya Iyaz, Extreme Heat Mitigation Strategy Specialist
Lara Whitely Binder, Climate Preparedness Program Manager
AGENDA

1) Background & overview: Heat strategy and ADS Actions

2) Discussion: What should the heat strategy address?

3) Discussion: Feedback on potential heat actions.

4) Further engagement opportunities

5) Wrap up
BACKGROUND & OVERVIEW: HEAT STRATEGY & ADS ACTIONS
URBAN HEAT ISLAND EFFECT

- Rural
- Suburban Residential
- Commercial
- Downtown
- Urban Residential
- Park
- Suburban Residential
- Rural Farmland
2020 HEAT MAPPING PROJECT

- Data collection: July 27, 2020
- Factors that influence heat include:
  - Impervious (hard) surfaces
  - Tree canopy
  - Built environment

Evening Area-Wide Temperatures (modeled; 7-8 pm)

Urbanized areas retain more heat relative to less urbanized areas
WE ARE MORE VULNERABLE TO HEAT THAN WE REALIZE
KING COUNTY’S FIRST EXTREME HEAT MITIGATION STRATEGY

- Action in King County’s Strategic Climate Action Plan (SCAP)
- Funded by FEMA’s Building Resilient Infrastructure and Communities (BRIC) Grant in September 2022
- Audience: King County, local jurisdictions, community organizations
- Focus
  - Short-term actions (emergency management, communications, etc.)
  - Long-term actions (urban tree canopy management, building codes, etc.)
- Completion date: June 2024
The goal of the King County Heat Mitigation Strategy is to equitably address and reduce the harmful effects of extreme heat on people and places in King County by:

- Effectively preparing for and responding to heat events when they occur,
- Expanding the use of built and nature-based solutions that reduce extreme heat impacts,
- Strengthening the resilience of communities most affected by extreme heat.
DISCUSSION: WHAT SHOULD THE HEAT STRATEGY ADDRESS?
1. What needs, barriers, and concerns should we address in the heat strategy to reduce heat impacts on seniors and people living with disabilities who are…
   - Homebound, including in-home care support services?
   - In independent living facilities?
   - In nursing homes and assisted living facilities?
   - A part of other groups or scenarios that we are missing?

2. Is there anything that would be uniquely challenging for people living with disabilities vs. seniors?

3. Who are the trusted resources that seniors and people with disabilities turn to for emergency and health-related information?
DISCUSSION:
POTENTIAL HEAT ACTIONS
ADS ACTIONS STARTED BEFORE SEATTLE HEAT WORKSHOP (MAY 2022)

- Supporting emergency planning
  - Developing cooling options with Seattle Housing Authority
  - Distributing heat safety information
- Establishing senior centers as cooling sites
- Fan distribution to ADS clients
- Providing at-risk clients with information and resources
- Supplying ADS staffing for on-call resources (Health One) and emergency service needs

<tbody>
<tr>
<td>Promoting AlertSeattle to clients</td>
<td>Ask ADS staff to encourage clients with email addresses to sign up for AlertSeattle.</td>
<td>Seattle heat plan – Aug. 2022 update</td>
<td></td>
</tr>
<tr>
<td><strong>Recommended action:</strong> Provide portable cooling centers plans to senior centers</td>
<td>Provide portable AC units and establish contracts that would allow senior centers to extend hours during a heat event and to build out a supporting transportation plan.</td>
<td>Seattle heat plan – Aug. 2022 update</td>
<td></td>
</tr>
<tr>
<td><strong>Recommended action:</strong> Create a recurring heat response emergency budget</td>
<td>This option was recommended for all agencies and programs at the heat workshop. One option was to contribute to an emergency response fund at the end of each year.</td>
<td>Seattle heat plan – Aug. 2022 update</td>
<td></td>

</table>
Potential topic areas:

- Emergency response
- Communications and education
- Housing infrastructure
- Community involvement and response
FURTHER ENGAGEMENT OPPORTUNITIES
SEEKING VOLUNTEERS: HEAT-SENSITIVE POPULATION WORKGROUP*

- **Workgroup purpose:** Ensure we are developing a strategy that will be effective and accessible for heat-sensitive populations, such as seniors and people with disabilities.

- **Format:** 3 – 4 meetings from ~May 2023 to ~Feb. 2024; **1.5 hours** each.
  - **Meetings 1 – 2:** Identify potential heat mitigation actions, evaluate and refine actions.
  - **Meetings 3 – 4:** Provide input on implementation and action evaluation, review any draft materials.
  - **Total commitment per person:** Around **6 hours total over approx. 10 months.**

- **Other potential members:** DCHS, HSD, direct service providers.

*In early planning phase; meeting agendas are still in development.*
OTHER WORKGROUPS*

- Built environment
- Urban forestry and open space
- Heat response
- Community partners

*In early planning phase; participant list and meeting agendas are still in development.
Workgroup meetings will be **1.5 hours** each.
Location (in-person or virtual) dependent upon participant preference.

**PLANNED WORKGROUP TIMELINE**

- **May/June 2023**
  - First meeting: Ideation

- **July/Aug. 2023**
  - Second meeting: Ideation, action selection

- **Sept./Oct. 2023**
  - Third meeting: Action selection, implementation planning

- **Nov./Dec. 2023**

- **Jan./Feb. 2024**
  - Fourth meeting: Draft review
NEXT STEPS

- Incorporate this feedback into heat action development and prioritization
- Convene workgroups
- Follow up with updates
THANK YOU FOR YOUR TIME!
