

COPES Waiver Services/MAC & TSOA

Home-Delivered Meals

When to Authorize

- Authorize provision of nutritionally balanced meals, delivered to the client in their own home, when:
- Home delivered meal provision is more cost effective than having a personal care provider prepare the meal; and
- The client is homebound (Definition: client is normally unable to leave home unassisted because doing so requires considerable effort. Client may occasionally leave home for medical treatment, or for short, infrequent, non-medical trips such as a hair appointment or church attendance); and
- The client is unable to prepare the meal and there is no other person, paid or unpaid, to prepare the meal.

Personal Care Hours must be Reduced:

If a client receives home-delivered meals, the number of personal care hours available for paid caregivers must be reduced. See [HDM Deductions Training Handout](#)

Additional Information

- Meals are dual oven-able (microwave or oven).
- The Case Manager can order up to 31 in a month for a COPES client (1 meal per day).
